OBJECTIVE

To use my expertise and experiences in product design to decisively combine innovative functionality with elegant, pleasing aesthetics within a dynamic, challenging environment

EXPERIENCE

Freelance Design Consultant / 2014 – Present

Senior CAD Contract Designer / 2011 – 2014

Moen Incorporated

North Olmsted, Ohio

- Provided on-site CAD technical support to multiple business groups with the organization
- Collaborated with engineers and industrial designers developing new faucet suites
- Worked with data vault storage system and engineering change management
- Re-designed existing parts and assemblies for manufacturing cost reductions

Product Design Consultant / 2008 – 2011

Ditropolis Incorporated

Phoenix, Arizona

- Managed and led product package development from concept to manufacture
- Generated and maintained a development schedule that included initial product research, concept ideation and illustration, 3D CAD development, presentation prototypes and supplier sourcing
- Utility patent disclosure draft and drawings

Lead Designer / 2004 – 2008

Innovation Alley LLC

Lyndhurst, Ohio

- Led design and development of a variety of product categories for a small start-up company
- Research and evaluate existing product markets and trends
- Concept sketches and presentations
- Established a prototype lab facility for developing engineering proof of concept mock-ups and finished presentation models
- Collaborated with outside engineering disciplines
- Supplier sourcing of product internal components for incorporation into CAD packages
- Initial utility patent disclosure drafts and drawings

EXPERIENCE continued

Managing Design Partner / 2000 – 2004
Transform Studios
Cleveland, Ohio

- Established and maintained a creative studio and prototype lab providing design services to companies, independent inventors and entrepreneurs
- Clientele with various industries including toys, housewares, automotive, exercise equipment, displays and custom furniture

Senior Designer / 1997 – 2000
Team Wendy LLC
Cleveland, Ohio

- Lead designer involved with updating the company's existing ski helmet design to an all-purpose / all-season sport helmet
- Emphasis on researching current styles and trends within the industry
- Established and maintained a prototype development lab
- Assisted with the design and fabrication of helmet impact test equipment to insure designs met ASTM safety standards
- Hands-on pattern fabrication for production of all helmet components and soft goods liners
- Worked with orthotists at the Cleveland Clinic Foundation in support of developing a remote practitioner kit for orthotic helmets that corrected deformational plagiocephaly in infants
- Worked with biomedical engineers at the Cleveland Clinic Foundation helping to design anti-SIDS headrest devices

Industrial Designer / 1988 – 1997
Nottingham-Spirk Design
Cleveland, Ohio

- Staff designer involved with prototype stage development for a wide range of consumer product industries
- Generated project layout and worked with shop personnel developing engineering and presentation prototypes
- Responsible for numerous mechanical innovations that provided additional intellectual property value to new products
